52730

Swivel Earpiece with In-Line Microphone and Push-to-Talk Button fits comfortably over either ear and is ideal for noisy areas.

RMN5114

Lightweight Temple Transducer Headset converts audio into sound vibration and transmits into the inner ear without covering the ear.

Models

CLS

Clear. Lightweight. Simple. Excellent choice for restaurants, groceries and retail stores. Designed for business productivity in mind, the CLS models are lightweight and comfortable to wear all day long.

DTR

Digital. One-to-many calling. No license required. Recommended for multiple business applications offering expanded coverage and increased battery life.

RDX

Industrial grade audio. Long battery life. Built tough. Perfect for construction sites, industrial facilities, warehouses, and any demanding work environment that requires durable communications equipment.
